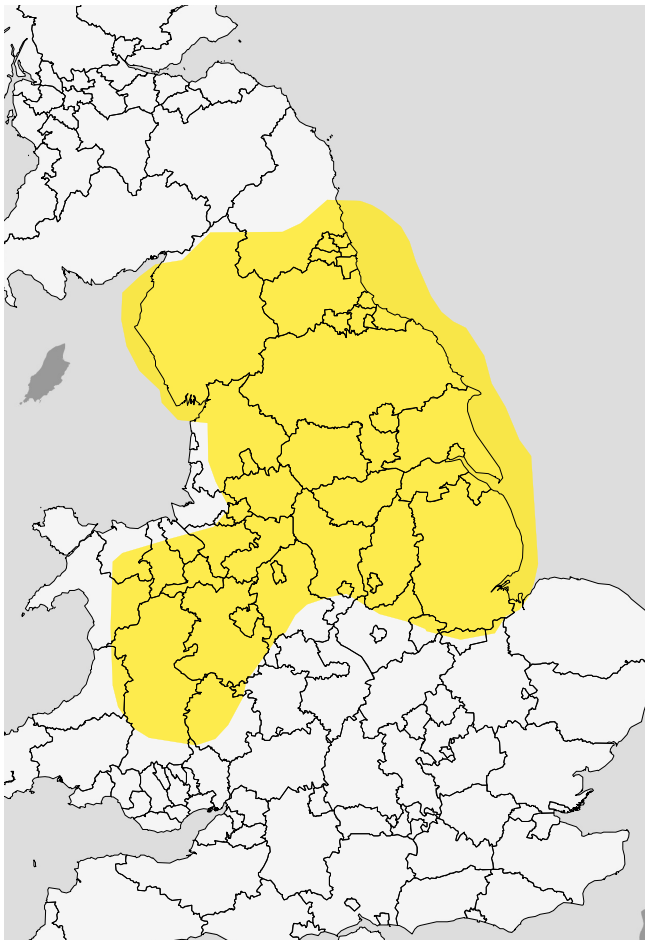
Yellow warning
Ice

Between
17:00 Sun 3 Dec 2023 and
12:00 Mon 4 Dec 2023



Icy patches are likely to develop this evening and overnight leading to difficult travel conditions

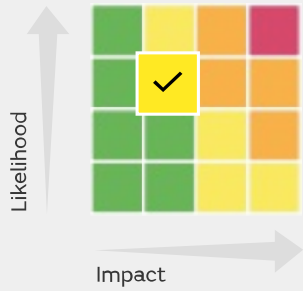
What to expect

- Some injuries from slips and falls on icy surfaces
- Probably some icy patches on some untreated roads, pavements and cycle paths

Further details

Modest thaw of recent snowfall will lead to wet roads and pavements. With temperatures falling this evening refreezing of thawed snow will lead to some icy patches on untreated surfaces. As well as this, later in the night rain will push north across much of the the area, initially falling on to frozen surfaces. Some snow is also likely, mainly across the hills and mountains of north Wales and The Peak District. Snow may fall to lower levels for a time tomorrow morning, especially across parts of Wales adding to the risk of ice.

What should I do?



Medium likelihood of low impacts

Yellow warning
Ice

Between
17:00 Sun 3 Dec 2023 and
12:00 Mon 4 Dec 2023

Further Details (continued)

Keep yourself and your family safe when it is icy. Plan to leave the house at least five minutes earlier than normal. Not needing to rush, reduces your risk of accidents, slips, and falls.

If you need to make a journey on foot or by bike, try to use pavements along main roads which are likely to be less slippery.

Give yourself the best chance of avoiding delays by checking road conditions if driving, or bus and train timetables, amending your travel plans if necessary.

Be prepared for weather warnings to change: when a weather warning is issued, the Met Office recommends staying up to date with the weather forecast in your area.
